

Questions & Answers

Below are the responses to questions received which were relevant to the present procurement:

1. What are HESAA's estimates for origination volume by loan type for the 2022/2023 and 2023/2024 academic years?

Origination volumes for academic years are based on multiple considerations annually including the volume originated in prior years, market conditions and other economic factors. Therefore, pursuant to Section 5.2 of the RFP, HESAA requests that firms provide three separate underwriting fee quotes for transaction sizes of \$175 million or less, up to \$250 million, and greater than \$250 million.
